Projects

The Pizza | Link   tailwindsCSS, NodeJS, ExpressJs, MongoDB, LaravelMix, Socket.io, Heroku.
The Pizza is a web application with a list of pizzas on the menu. so User can choose pizzas of their choices and can add that to their cart. After that they can place order for same and can track the live status of their order This webites is hosted on heroku platform and and it has a responsive and good UI and the backend logic is handled by REST API, thus making it a complete dynamic website

Weather App | Link   HTML, CSS , JavaScript
Weather app is a web application where we can see the temperature,weather , and time of a particular region.Here I'm using OpenweatherAPI to get the data and I'm using the javascript fetch method to get the data from API, Also the website has a good UI.

Travello | Link   Bootstrap, NodeJS, ExpressJS, JWT, BcryptJS
Travello is a website displaying travel destinations It is a Dynamic website and has complete authentication on login. It uses session logout feature. The user has to   first register and create an account on website. After that they can login.
